

My Miracle Machine!

I just recently was visiting with Joffrion Mitts, President Level distributor from New Orleans. She was concerned that we were selling the Chi Machine for too low of a price. Contrary to most other distributors during a time in our economy when everyone wants to give deals, Joffrion says this is a Miracle Machine. If anything, the price should be higher.

The following is Joffrion's story about how her mother, after several years of marginal life, showed a remarkable turn-around in her health after using the Chi Machine.

- Bob Nelson, Saint Paul, MN

I have had poor circulation in my lower legs and feet my whole life. It didn't stop me from participation in every activity possible growing up and becoming an avid walker as an adult. But I always had achy legs, cold feet and purplish toes throughout my 24 years of teaching. Looking back, I don't know how I did it! Now, because of the Chi Machine, all of that has changed-and I have pink toes! My energy level and immune system have dramatically improved.

I first got on the Chi Machine for 3 minutes; and when I got up I said, "Wow!" That was probably the first time I got an adequate amount of circulation through my lower legs. I immediately called my mother, Pinkie, because I hoped it would help her too. In 1996 she had a brain tumor the size of a baseball removed. While the surgeons were prepping her for surgery, they discovered she had congestive heart failure and atrial fibrillation. She had been misdiagnosed with Alzheimer's and overmedicated.

Mama survived the surgery, but two weeks later blood clots destroyed a whole lung and half the other. The doctors said it was a miracle she survived and that her brain, heart, and lung cells could not rejuvenate. For four long years her personality seemed gone, and her quality of life was greatly diminished. She was also diagnosed with diabetes. She couldn't drive and became dependent on others for just about everything. My sister Chandler became her primary caregiver.

The week after I got my Chi Machine, I brought it to our family vacation at Gulf Shores, Alabama. We

put Mama on the Chi Machine for one minute the first day and for a minute and a half the next. The second day she took a walk down to the beach! It was

incredible! A week later she was walking around the grocery store without using the motorized cart!

After eight months of using the Chi Machine, Mama's personality came back and her health improved dramatically. Mama's neurosurgeon was totally amazed and gave her permission to drive. We never dreamed she would be able to drive again!

After using the Chi Machine for a year, her cardiologist told us Mama did not have congestive heart failure anymore-who ever heard of that! Her lungs are now normal, and she does water aerobics for exercise and uses the Chi Machine for 12 minutes twice a day. Mama's doctor took her off the diabetes medication because watching her diet and using the Chi Machine daily keep her blood sugar under control. My mother has her life back because of the Chi Machine!

I whole-heartedly believe that everyone needs a Chi Machine. The secret to my success is that I love my Chi Machine and I let everyone know it.

I have a poster in my bedroom, which has been an inspiration to me for years, "Success Is A Journey - Not A Destination." I see it every morning when I awake. My Chi journey began when I first heard about the Chi Machine in July of 2000. Today because of the Chi Machine I have no more achy legs, cold feet, or purplish toes. I have pink toes and a lot more energy!

My Miracle Machine continued from Page 1...

When my mother's personality came back, I realized I could be successful selling Chi Machines. After all, what kind of person would I be not to share this miracle with everyone, especially those with chronic conditions? I decided to purchase extra machines to lend out and have some on hand for immediate sale. I set a personal goal to earn a free Chi Machine® each month through the Jump Start Program. So far I have earned over 25 Chi Machines and one HotHouse™! I encourage and support those in my group to do the same. I don't give up when someone says, "No thanks." I believe everyone will buy one eventually. It took my best friend ten months to get a Chi Machine. A good friend of my sister took two years and ten months. I have had my Chi Machine for four years, and my brother does not have one yet. Will he get one? Of course!

I was not on the fast track to President, but from day one my goal was to become President. I wrote on sheets of paper "I am a Manager" and put them in my bedroom, bathroom, and kitchen. I simply persevered and earned a free Chi Machine each month. In 2001, I became Manager. In 2002, I became Vice President, and in June 2003, I became President-Level Distributor! When I was Vice President, I got on the Chi Machine twice a day, every day and I said over and over, "I am a President Level Distributor with HTE."

The most important and satisfying thing for me is helping others to have a better quality of life. I also enjoy the residual income, which comes from my group, especially my four Managers. My strength is "One-on-One." I spend an average of one and a half hours with each person I lend a Chi Machine to. I get to know the person, tell her/him about the Chi Machine, and demonstrate how to use it. I'm in present time with no interruptions on my part. It takes a lot of my energy, but it is worth the effort. Sometimes "I get knocked down, but I get up again" as the song goes. It is very important to have fun!

I had a monthly newsletter for over two years; now it's quarterly. I stay in touch with people who have Chi Machines and that increases my chances of getting referrals, which is where most of my business comes from. I also host a "Health Matters" workshop with a guest speaker every six months where all my new Chi friends can come and invite their friends. We have a "tea party" following the workshop so everyone can get to know each other. I do trade shows and some advertising, but most of my business comes from referrals.

I whole-heartedly believe that everyone needs a Chi Machine. The secret to my success is that I love my Chi Machine, and I let everyone know it.
