WHAT MAY THE FAR INFRARED HOT HOUSE DO FOR YOU?

1. ___Would you like to virtually eliminate pain in 25 minutes?
2. ___Would you like to reduce muscle strain?
3. ___ Would you like to have air pathways in the lungs opened up?
4. ___ Would you like to increase the circulation in your cells?
5. ___ Would you like to increase oxygen in the cells & ferry out carbon dioxide?
6. ___ Would you like to change the acids in the cells to alkaline reducing lactic acid?
7. ___Would you like to better detoxify the body and cells?
8. ___Would you like to decrease free radical destruction?
9. ___Would you like to release build up of lactic acid and ammonia after exercise?
10. ___Would you like to help lower inflammation of wounds and tissues?
11. ___Would you like to reverse the electromagnet fields from computers, TV, etc?

12. ___Would you like to increase the extensibility of Collagen Tissues?
13. ___Would you like to reduce pain and increase healing from the effects of Cancer radiation or chemotherapy treatment?

If a Therapist or Health Professional

___Would you like to make your job easier by putting your clients on the Hot House and Chi Machine before therapy?

___Would you like have every client emotionally ready to go in 5-15 minutes without you're being there?

___Would you like to work your clients deeper, work faster, and easier?

___Would you like to increase your income by in a way that benefits your Clients yet decreases the time spent with each client so you can see more clients or be able to take a breathing space between clients?

Far Infrared Dome (Hot House)

The Far Infrared Dome uses technology from the NASA space program to make Far Infrared Rays that activate enzymes in the body to create nitric oxide. The action of nitric oxide was not discovered until about 1991 by Dr. Salvador Mondada. And then three Pharmacologists, Robert F. Furchgott, Louis J. Ignarro, and Ferid Murad, won the Nobel Prize in 1996. There are over 10,000 Clinical Studies on NO. They are listed in the American Journal of Hypertension, American Journal of Physiology, Annals of Internal Medicine, Cardiology, Circulation, Hypertension, Journal of the AMA, Journal of Immunology, Lancet, Nature, New England Journal of Medicine, Proceedings of the National Academy of Sciences, Science, and Urology. Recent research shows what nitric oxide does: (A Neurotransmitter that turns things on and off)

The Far Infrared rays from the Hot House activates arginine in the body to create nitric oxide (NO).

"NO (nitric oxide) **relaxes arteries**, thereby helping to maintain **normalizing blood pressure**. . .unless NO is otherwise in short supply in the body.: (Improves Heart function). It **directs the beating of the heart**, triggering the heart to beat faster or slower." Dr. Furchgott discovered NO is the mechanism relaxing the heart known as the "endothelium-dependent relaxing factor." Lack of oxygen constricts the heart. (NO **carries oxygen in and carbon dioxide out**)

"It helps keep **open the coronary arteries, preventing angina pain.**"
"It's a **free-radical scavenger** that helps to **lower serum cholesterol** and **prevent "bad" LDL cholesterol from oxidizing and becoming worse.**"
"It's a **powerful anticoagulant (blood thinner)** that helps prevent blood platelets from clumping together and causing heart attack and stroke.
"It enhances blood flow to the penis, helping to **boosts erections.**" (Like Viagra)
"It **enhances sexuality for women** as well."
"It serves as a critical "bullet" by different immune-system cells that use it to **kill bacteria and viruses** and **even shrink some cancerous tumors.**"
"It functions as a "**messenger molecule**" allowing **nerve cells and brain to communicate** with each other."
"It is used by the brain to **encode long-term memory** and **ensure blood flow to brain cells.**" (Improves memory function)
"It **helps regulate insulin** secretion by the pancreas, reducing the risk of diabetes.
"It **helps control the lung airways**, allowing one to breathe easier and avoid lung problems."
"It **relaxes "hypertonic" spincter muscles, preventing and healing hemorrhoids.**"
"It stimulates the body into **releasing** the all-important **human growth hormone**, a key to longevity as well as improvement in body composition by **boosting lean muscle mass** and **bone density** while **decreasing fat tissue.**"(Boost muscle growth)

15. "Dr. Jonathan S. Stamler at Duke University Medical found NO **binds to hemoglobin delivering oxygen** to our cells, then **ferries carbon dioxide** back to the lungs for discharging." "It regulates all cell function and communication."

16. "NO **helps the body eliminate ammonia** that accumulates as a toxic byproduct of muscles building, sprinting, and other short explosive bouts of exercise." (anti-aging).

17. "NO **regulates the intestinal movement.**"

18. "NO **directs the muscles** of the arms, legs, and **all bodily movements.**"

19. "**Diabetes accelerates hardening of the Arteries.**" "NO directs the insulin that regulates blood sugar and **reduces Lipid peroxidation.**" Lubec, B.

20. "NO **triggers the release of Prostaglandins** that **lower inflammation and pain.**"

21. "Drs. Barbul and Albina found NO reduced inflammation and **speeded up the rate of healing.**"

22. "**It inhibits the growth of Cancer Cells.** (Hibbs) (Kwon) It dramatically **reduces the pain associated with Cancer.**

23. I have used it and seen it used on hundreds of clients. In twenty-five minutes I have been able to take the pain away in about 90% of the people.

"It has been recently discovered that Diabetes, Atherosclerosis, oxygen free radicals, aging of body systems, hypertension, coronary heart-disease, high cholesterol impairs the ability of your endothelium to produce nitric oxide when and where is it needed."

Johnstone, M. T., Joffee, I. I., Schmidt, H. H., Pieper, G. M. This being true you can probably use the Far Infrared Hot House to warm the endothelium (cells in the walls of blood vessel that regulate clotting) and increase the production of nitric oxide.

L. John Mason, Ph.D. of the Pain and Anxiety program from the Success Education Center in Cotati, CA had a protocol "by **warming the extremities**, the hands and then the feet, you can prevent or at least, minimize symptoms of stress that manifest, viz:"

1. **"Stress caused or Situational High Blood Pressure"**
2. **"Rapid or Irregular heart Rates"**
3. **"Migraine headaches"**
4. **"Panic and Anxiety"**
5. **"Many Digestive symptoms"**
6. **"Raynaud's Syndrome"**
7. **"Many symptoms of Sexual Dysfunction including Infertility, Impotency, and Lower Libido."**

"Some people believe that they are having a heart attack because often there is chest pain, a shortness of breath, neck or arm pain, major stomach upset, an adrenaline rush, lightheadedness, dizziness, and other unpleasant feelings of fear and apprehension."

"In order to lower blood pressure, controlling panic/anxiety, preventing migraines, reducing stress, decrease digestive symptoms take a stress card or thermometer and place it on the middle of one of your index finger and big toe. Wait 1-2 minutes and determine the temperature of the skin over the middle of this finger. It will range from 65 degrees to up to 97 degrees. Ideally, you want to have your hands and big toe at about 93-95+ degrees. This warming will let go of constricted blood flow and can be enhanced with the use of the Chi Machine in Conjunction." (L. John Mason)

nitric oxide (NO)

From the Book, "Nature's Answer to Arthritis, Cancer, & Alzheimer's Disease"

“A natural approach to inflammatory disorders – for Doctors and Patients alike.”

By Thomas M. Newmark & Paul Schulick

“Picture an inflamed area (of the body) engorged (with pain). Then through chemical signals you summon for help the **cytokines and chemokines to identify the problem**. These summon the angry white blood cells, firing away with their oxidative ray guns.” They are shooting bursts of free radicals of oxygen at invaders. We mean this literally - that’s one of the ways white blood cells work. They work by producing free radicals to act as biological thieves, to steal electrons to assist the breakdown of damaged tissue or invading foreign substances.”

What do scientists know about nitric oxide (NO)?

- (1) “nitric oxide flits about the body at speeds almost too fast to measure. One researcher finds it difficult to understand, “it is everywhere and it’s nowhere.” It appears to travel just below the speed of light.” As soon as it delivers its message by photon light it disintegrates and is gone.
- (2) NO is a **free radical creator and identifier** determining which bad cells are to be destroyed. It is involved in the process to **oxidize the bad fats and toxins** in the body. Without NO we would have a toxic dump in our body.
- (3) “nitric oxide (NO) plays a role in **regulation of brain activity** and (detection of) **inflammation of brain plaque.**”
- (4) “nitric oxide plays a part in **inhibiting and blocking COX 2 inflammation of wounds and tissues** for all diseases with a lot of research for Alzheimer’s, Parkinson, Arthritis & Cancer.”
- (5) “nitric oxide **facilitates the changing & maturing of thought** into **action.**”
- (6) It is thought to be a “**messenger molecule.**” Brett DS, Snider SH: nitric oxide: A physiologic messenger molecule. Annu Rev Biochem 1994;63:175.
- (7) “It is at the root of many disease conditions including Arthritis and Cancer.”
- (8) “L- Arginine and other enzymes convert to nitric oxide, which detoxify cells.”

The drug Viagra creates nitric oxide. NO is involved in male erections.”

From the Textbook, “Harper’s Biochemistry,” 24th edition Chapter 58.

- (1) "NO is formed from either the enzyme Arginine or from nitrite formed from glyceryl trinitrate during metabolism in the body."
- (2) "NO is formed in the endothelial cells from Arginine and Calcium and **causes the smooth muscle cells to relax.**" This means the hot house is a good preparation **before massage or during massage.**
- (3) "This contraction-relaxation cycle of 3-4 seconds of NO **generates storage of ATP (energy),** which provides the **energy for the skeletal muscles.**"
- (4) "NO has a very short half-life (approximately 3-4 seconds) in tissues, because it reacts with oxygen and superoxide. The superoxide combining with NO decomposes into a highly reactive OH free radical **identifying the bad cells for destruction by T cells and killer cells.**" If bad cells are not destroyed, cancer cells accumulate." (Mongada)
- (5) "NO **causes vasoconstriction,** the narrowing and contraction of blood vessels."
- (6) "NO is of major importance in **maintenance of blood pressure.**"
- (7) "NO causes a **resistance to vascular stroke.**" (Loscalzo)
- (8) "NO is a **beneficial neurotransmitter in the brain and peripheral autonomic nervous system.**" This causes the parasympathetic nervous system to turn on and all the muscles and body systems to relax causing the body to become unstressed and relax.
- (9) "NO reacts with the primitive immune system" to **enhance the immune system.**
- (10) "NO **inhibits adhesion activation, and aggregation of platelets.**" It keeps the individual **blood cells from sticking and coagulating** together allowing oxygen and nutrients to get into the cell and wastes to get out.
- (11) "NO plays a role in **neurotoxicity (of nerve cells), detoxifying the neuron cells,**" and all other individual cells of the body.
- (12) "Keeps the **DNA** (cell duplication) and **ATP (energy storage & production)** from **becoming overrun by toxins and chemicals.**"
- (13) You must do something to enhance processing of toxins and free radicals by the cells when using the hot house by drinking water before and after and encouraging one to use the bathroom

By Donald M. McLeod M.D. & Philip A. White M.D.

“Free radical fighters such as nitric oxide and superoxide are used as toxins by cells of the immune system to destroy viruses and bacteria, and free radicals are used as well to kill cancer cells. Further, nitric oxide is always necessary to the body in helping regulate blood vessel dilation, and thereby, the circulation of blood. It is beneficial **Arthritis, Inflammatory Disease, the Immune System, and Lung Disease.**” p 40, (Hilliquin) (Hamid)

“nitric oxide is beneficial in **Renal Health and Disease.**” (Kone)

“nitric oxide assists in regulating the flow of blood by controlling the constriction or relaxation of muscles in blood vessels. In a similar way it affects muscles in the digestive tract, thereby aiding in digestion. It also serves as a **signaler in turning genes on and off**, and as a neurotransmitter, where it plays a **part in brain cell communication.** p 166.

“nitric oxide plays a significant role in the immune system. Some of the immune cells produce nitric oxide with which to **destroy invading bacteria, or rogue cancer cells.** nitric oxide, generated by the action of nitric oxide synthase, is produced in other parts of the body including the endothelium (lining artery walls), in central and peripheral nerve cells, in **skeletal muscles**, and in the **epithelial cells lining the bronchi, uterus, and stomach.** “ P. 167.

“nitric oxide is important in dilation of Blood Vessels **preventing artery spasms leading to Heart Attacks** and in lowering blood pressure.” S. Taddei, et.al. Circulation 97:222-29, (1998)

The H (Homocysteine) Factor Solution by James Braly MD

“Postmenopausal women experiencing **Estrogen deficiency also have nitric oxide deficiencies.**”

“nitric oxide is a potent antioxidant, neurotransmitter & artery wall relaxer.”

Another big factor in high blood pressure and heart attacks is a deficiency of nitric oxide in your artery walls. nitric oxide **regulates muscle tone of the arteries.** nitric oxide **prevents arteriosclerosis** and injury to vessel walls. It is also a powerful antioxidant, anti inflammatory, brain cell protector, neurotransmitter (chemical messages in the brain) memory and learning enhancer.”

“The **more nitric oxide produced in arteries**, the more the muscles relax and increase in diameter. **Blood**

Pressure also falls in the process. nitric oxide also **causes the bladder wall to relax.**” “nitric oxide and high glutathione **lowers Homocysteine** from the amino acid methionine. When we eat too much meat, cheese, and protein too much homocysteine is created from the amino acid methionine. When the methylation process is going on, our DNA can not repair itself and puts us at risk of cancer, Heart attacks, and autoimmune disease. High homocysteine causes oxidation and aging, weakens the immune system, damages the brain, lowers IQ, increases pain, inflammation, blood clots, creating problems of detoxing, risk of cancer, heart problems, stroke, diabetes, ages the brain, hormonal problems, lowers vitamin B’s and SAME.”

From the Book “The Natural Pharmacist” by Steven Bratman, M.D.

“If you are exposed to nitric oxide you need extra Vitamin B 12 & B 6.”

James Braly, “**The H Factor Solution**”

“Low levels of nitric oxide cause high homocysteine. which is associated with increased **risk of Alzheimer’s.**” “Another big factor in High Blood Pressure & heart attack is a deficiency of nitric oxide in the artery walls. nitric oxide regulates muscle tone of the arteries. nitric oxide prevent arteriosclerosis & injury to vessel wall. It is also a powerful antioxidant, anti-inflammatory, **brain cell protector**, neurotransmitter (sending chemical messages in the brain).”

“Another big factor in High blood Pressure & Heart Attack risk is a deficiency of nitric oxide in your artery walls. This highly versatile and important biochemical regulates the muscle tone of arteries. NO also prevents Atherosclerosis and injury to the vessel wall. At the same time, it functions elsewhere in our bodies as a powerful antioxidant, anti-inflammatory, brain-cell protector, neurotransmitter (chemical messenger in the brain), and memory and learning enhancer, relaxes the bladder wall and **dilates the airways.**”

P 75

“The more nitric oxide produced in the arteries, the more the muscles relax & increase in diameter. Blood Pressure also falls in the process and the bladder wall also relaxes.”

“When high methylation, from high homocysteine, is going on, our DNA can not repair itself and puts us at risk of cancer and autoimmune disease.”

“High homocysteine accelerates oxidation and aging, weakens the immune system, damages the brain, lowers your IQ, increases pain, inflammation, blood clots, causes problems of detoxification, increases the risk of cancer, ages the brain, creates hormonal problems, creates diabetes, and stroke, dilates the airways, and lowers vitamin B and SAME.”

“High homocysteine (and low levels of folic acid) also affects a gas that is crucial to arterial flexibility: nitric oxide.” p. 26

“High Homocysteine not only lowers normal nitric oxide production and interferes with magnesium (both of which raise blood pressure), damages the walls of the arteries, oxidizes LDL cholesterol, makes the blood stickier and more likely to clot abnormally. “

“Cardiovascular Disease, poor blood circulation to the brain, silent strokes, as well as low levels of B Vitamins, methylation, SAME, nitric oxide, and glutathione—all of which homocysteine does cause—are associated with increased risk of Alzheimer’s disease. “p 92

(It appears the Far Infrared Hot House can enhance the need for extra nitric oxide)

“**Estrogen-deficient postmenopausal women** have B Vitamin deficiencies, zinc, and magnesium deficiencies, methylation deficiency, SAME, nitric oxide, and Glutathione deficiencies and high homocysteine levels.”

From the Book “The High Blood Pressure Hoax,” by Sherry A. Rogers, M.D., p. 30.

“When the blood vessel lining, the endothelium, is diseased or damaged it no longer works or functions like it should. It tends to tighten and cause high blood pressure or form clots that lead to heart attacks and strokes. Luckily, NO (nitric oxide gas made in the innermost blood vessel endothelial lining) also heals damaged blood vessels. But when blood vessel wall become loaded down with cholesterol, they don’t send out their message to make vessel-expanding (vasodilating) nitric oxide very well.”

“Many other factors can cause ED (endothelial dysfunction):

being several hours after a high fat meal (or trans fats),

being low (or missing) in various nutrients (in the diet),

needing an oil change in the cell membranes,

having too many chemical like mercury, (heavy metals), pesticides, and herbicides, stockpiled in the blood vessel lining (see Chapter 4).

“These all contribute to abnormal and impaired endothelial function. And when the blood vessel endothelial lining is not function, we don’t just get high blood pressure. Every organ in the entire body is in danger of deterioration, dysfunction, and accelerated aging.”

“Now, Scientist have discovered how the body makes nitric oxide in the endothelial lining (of the blood vessels & organ tissues). It begins with arginine, a simple amino acid from protein. In fact, researchers have shown

that when the blood vessel lining or endothelium is healthy and making enough nitric oxide, this prevents many calamities:

“nitric oxide” relaxes the blood vessel muscle thereby lowering blood pressure,

It keeps platelets from sticking to the blood vessel wall and forming plaque and occlusions that lead to a heart attack and stroke,

It regulates many other enzymes that promotes longevity. In fact, the endothelium is like a master hormone that talks to all the rest of the body’s cells and directs their actions.

But most importantly, not only does nitric oxide slow plaque growth,

But suppresses arteriosclerosis from even forming,

And nitric oxide has actually melted away plaque that already existed on artery walls.”

PROPERTIES and BENEFITS of USE of FAR INFRARED THERAPIES

(From Research & Commercial Applications in Japan, Europe, & China)

The FAR INFRARED HOT HOUSE works ON 2 PRINCIPLES

AT THE SAME TIME!

DRAMATIC USE OF HYPERTHERMIA

HYPERTHERMIA – (Heating the Tissue and Body Systems to about 106 degrees.)

It is used heavily in Europe in Conjunction with Chemo Therapy & Radiation

“One of the difficulties with cancer, cancerous cells are very difficult to target specifically. They can hide among normal cells. But malignant cells are more sensitive to heat than normal cells. Raising the temperature of the tumor (with the Far Infrared) is one way to **help identify the cancer cells.**”

“Hyperthermia can be used by itself, and **results in impressive shrinkage** and even **complete eradication (10-15%) of tumor.** However, these results usually don’t last and the tumors may regrow. However, in Clinical Studies on **transplanted mammary carcinoma**, radiation alone produces no cures (in China), **heat alone produced 22% cures, & combining Hyperthermia with radiation produces 77% cures.**”

“There is one American phase three, clinical trial that shows positive results with very difficult **cancers** like

brain, liver, & advanced kidney. It is well suited in treating small superficial tumors within (7cm under the skin.)”

www.geocities.com/Hot <<http://www.geocities.com/Hot>> Springs/Villa/5443/alts/hytherm.html

HYPERTHERMIA & LYMPHOME IS EFFECTIVE. Medline has numerous studies on this issue. The following Universities are doing research on Hyperthermia: Washington University, University of Wisconsin, and Duke University.

MEDICAL RESEARCH in CHINA, JAPAN, & EUROPE

Hyperthermia & Lymphoma

A Study in Australia gave “Hyperthermia (42-44 degrees C for 30 min to 1 hr) can induce apoptosis in a variety of cell types and tumor cell lines. This process is usually, but not invariably unaffected by RNA and protein synthesis inhibition. C-fos expression has been expression has been implicated in the regulation of apoptosis. By heating a Burkeitt **lymphoma cell line**, for **43 degrees C for 30 min**. approximately **60% of cells underwent apoptosis** within 6 hours of treatment.”

Dr. F. Lehman – “Summary of Heat & Cold,” 4th Edition Chapter 9

14. “Increases the extensibility of Collagen Tissues.

“Study shows 20 people increased **10-18% increase in Tissue length**.

“There was valuable work with **ligaments, joints, tendons, fascia, and synovium** that have been scarred, thickened or contracted. It is great for **Training Competitive Athletes** by **reducing down time**.

15. “Decrease Joint Stiffness by 20%.”

16. “Reduced Muscle Spasms.”

BENEFITS from the FAR INFARED (Research from Japan)

A. Dr. Yanajaki – “INFRARED THERAPY”

Dr. Yanajaki found the following results in Clinics in Japan:

- < **“Burns – Relieves Pain, Increases the Healing Rate, Less Scaring**
- < **“Lower Blood Pressure**
- < **“Repairs Brain Damage (Contusions) Accelerates repair time.**
- < **“Short Term Memory Improves**
- < **“Cancer of Tongue reversed**
- < **“Neutralizes Electromagnet Fields (Computers, Microwaves, etc.)**
- < **“Helps recovery of Cerebral Hemorrhages: - enhanced & speeds up**
- < **“Auto Accidents – Reducing Pain - Best Results – repeat in 3 days**
- < **“Helps Arthritis, Gout, Rheumatic Arthritis**
- < **“Helps Menopause Symptoms – relieves chills, nervousness, depression, dizziness, head and stomachaches.**
- < **“Creates Beauty – Creates Glowing Skin – Cleanses Cells - Cellulite**
- < **“Weight Loss (Trim Thighs, Hips, and Stomach).**

B. USED IN 40 REPUTABLE CHINESE MEDICAL CLINICS: FOR:

- | | |
|-------------------------------------|----------------------|
| * Soft Tissue Injury | * Lumbar Strain |
| * Periarthritis of the Shoulder | * Neurodermitis |
| * Sciatica Pain during Menstration. | * Eczema w/Infection |
| * Foot Surgery | * Diarrhea |
| * Cholecystitis | * Neurastheria |
| * Pelvic Infection | * Infection |
| * Pediatric Pneumonia | * Frost Bite |

* **Bells-Palsy**

C. Dr. Masao Mahamura of the O & P Medical Clinic in Japan uses the Fir Infrared
for : * **Whiplash** * **Sciatica** * **Menopause**

* **Arthritis** * **Rheumatism** * **Shoulder Stiffness**
* **Ear Diseases** * **Insomnia** * **Gastrential Problems**
* **Muscle Spasms*** **Back Pain** * **Acne**
* **TMJ** * **Adhesions** * **Repetitive Stress**
* **Trauma** * **Gout** * **Disc Protrusion**
* **Brain Contusion*** **Tight Shoulder** * **Compression Fractures**
* **Post Exercise Muscle Pain** * **Bursitis**
* **Peripheral Vascular Diseases** * **DJD**

CONTRAINDICATIONS: (From 40 Medical Clinics in Japan – Dr. Yanajaki)

Adrenal Suppression, Lupus, M. S. (Most are Heat Sensitive), Inflammation (Heat) in the area (Spine) or Joint, Recent Acute Joint Injury, Pregnancy, Silicone Implants - if you feel Pain, Hemophiliac, Hemorrhaging, Pace Makers, and Implanted Devices.
